

# Catching Vulnerabilities & Trapping Exploits

Canary Trap's elite team of security experts come armed with the tools, experience and credentials to help improve your organization's security resiliency and cyber risk posture.

## WIRELESS SECURITY ASSESSMENT

Strengthening the security posture of your wireless network(s).

#### SERVICE OVERVIEW

Your business depends on employees having stable and secure wireless access. Wireless communication enables mobility; however, mobility can introduce security vulnerabilities that can often go undetected. Without a secure configuration, the enterprise is unable to protect against unauthorized network access. Our Subject Matter Experts (SMEs) will look to identify any security gaps that can be exploited by threat actors to cause harm to your organization.

Canary Trap maintains an in-depth understanding of the threat landscape. Our SMEs leverage proven processes, tactics and techniques to assess the security of your wireless network(s). Canary Trap will assess the current state of your sanctioned wireless assets including configuration standards.

Our testing methodology follows documented industry best practices for security testing:

- Rules of engagement
- Onsite external wireless scanning
- Analysis and identification of attack vectors
- ✓ Vulnerability testing and verification
- ✓ Wireless device/server configuration review
- ✓ Wireless policy review
- ✓ Wireless topology mapping

At the end of the engagement, Canary Trap will deliver a comprehensive Report of Findings. We will highlight identified vulnerabilities along with any associated opportunities to improve security and mitigate cyber risk.

Canary Trap combines human expertise with sophisticated tools, proven methodologies and, where appropriate, threat intelligence to ensure a thorough, in-depth approach to security testing and assessments.

## **Engage Canary Trap Specialists**

Complete our Scoping Questionnaire at www.canarytrap.com or Contact Us directly by telephone or email.

## Report of Findings

Canary Trap will deliver a Report of Findings highlighting any identified vulnerabilities for remediation.

#### The Canary Trap Approach

- ✓ Step 1: Define
- √ Step 2: Uncover
- √ Step 3: Report
- ✓ Step 4: Remediate
- √ Step 5: Retest
